

ABRA Update #174 – March 29, 2018

Tree Felling Extension for ACP Denied by FERC

A request by Dominion Transportation, Inc. (DETI) and Atlantic Coast Pipeline, LLC to extend the deadline for tree felling until May 15 has been denied by the Federal Energy Regulatory Commission (FERC). Responding to a March 15 request for an extension of the tree felling deadline (March 15 for Virginia; March 31 for North Carolina and West Virginia), FERC stated in its [March 28 letter](#):

As part of your applications, Atlantic and DETI committed to minimizing impacts on both migratory bird species and threatened and endangered species by adhering to time-of-year tree felling restrictions. Accordingly, this mitigation measure is one of many that the Commission considered in its Order when granting Certificates to Atlantic and DETI. After a thorough review of your request, we find that it would not offer an equal or greater level of protection, and deny Atlantic and DETI's request to modify the time-of-year restrictions established during project review.

The impact of the denial to extend tree felling for the ACP will likely result in adjustments to the construction timetables for the project. ABRA's Compliance Surveillance Initiative (CSI) program is evaluating the specific effect the denial may have. Further details will be provided in next week's *Update*. Dominion/ACP has 30 days to appeal the ruling.

MVP Obtains Water Quality Certification from Virginia DEQ

The Virginia Department of Environmental Quality (DEQ) has issued a report declaring approval of environmental plans for the Mountain Valley Pipeline (MVP) that cover erosion and sediment control, karst evaluation and stormwater management. [The March 26 DEQ memorandum to the State Water Control Board](#), which had approved a water quality certification for the MVP at its December 7 meeting, concludes:

As shown in this report, the oversight process for MVP has been more rigorous than any other pipeline in Virginia history. DEQ has carefully reviewed MVP's Supplemental Karst Evaluation Plan, Annual Standards and Specifications, and Erosion and Sediment Control and Stormwater Management Plans. By letter dated March 13, 2017, DEQ concurred on the Supplemental Karst Evaluation Plan. By letter dated June 20, 2017, DEQ determined that the Annual Standards and Specifications were in compliance with the State Water Control Law and applicable, duly-promulgated regulations and were approved by DEQ. By [letter dated March 26, 2018](#), DEQ determined that the Erosion

and Sediment Control and Stormwater Management Plans were in compliance with the State Water Control Law and applicable, duly-promulgated regulations and were approved by DEQ.

Stream Monitoring Webinar Recordings Now Available

Recordings of recent stream monitoring webinars conducted by Trout Unlimited are now available via links. The March 7 event hosted by Appalachian Voices for Virginia is available [here](#). The March 27 webinar for West Virginia, hosted by the West Virginia Rivers Coalition, is available [here](#).

Your Help Is Needed: Sign Up as a CSI Volunteer!

Recruitment of participating volunteers in ABRA's Pipeline Compliance Surveillance Initiative (CSI) is underway. In order for the program to monitor construction activity for the Atlantic Coast Pipeline to be fully effective, volunteers are needed. To sign-up, click [here](#). To learn more about the totality of the CSI program, visit the website [here](#).

In the News:

Local/Atlantic Coast Pipeline

To protect birds and endangered bats, feds reject Atlantic Coast Pipeline bid to continue cutting trees

- The Roanoke Times – 3/28/18

http://www.roanoke.com/news/virginia/to-protect-birds-and-endangered-bats-feds-reject-atlantic-coast/article_42969669-642f-500a-acca-8cee777d18d3.htm

The Atlantic Coast Pipeline got a rare rejection Wednesday from federal officials who nixed a request from the divisive Dominion Energy-led project to push past seasonal tree-cutting restrictions that are intended to protect endangered bats and migratory birds.
